

Helical fixed folders

MACHINE TYPE: X2

REFERENCE CODE: X2.79

Description

The helical fix folder simplifies the execution of innerliner folding.

The kit features new second wheel pockets with fitted folders and upgraded mouthpiece with fixed helical folding features. The new group removes all moving folders on the 2nd wheel which reduces the need for several spare parts, improves the quality of folds and simplifies the setup. As the bundle transfers from the 1st wheel into the 2nd wheel, the innerliner begins to fold around it. The bundle then transfers to the 3rd wheel through the newly designed helical folder mouthpiece completing the remaining folds.

Helical fixed folders

Advantages

- Reduced maintenance and spare parts
- Improved product quality thanks to the removal of the moving folding components
- Easy installation requiring zero adjustment
- Reduced wear of parts increasing mean time to failure
- Improved consistency of side folds around cigarettes

Assembly time

One (1) working day for installation by one (1) mechanical technician.

Validity

The helical fix folders are available for any pack size having inner bundle width between 39 and 56 mm and height between 16 mm and 25 mm.

Other pack sizes can be considered by request.

How to order

Machine S/N and format dimensions are required to complete the Production Order.
